

Too easy to use the proposed ban on "locally oriented" content to also suppress other XM/Sirius channels such as those that broadcast out of mainstream music and even worse political views that are not those held by the local majority. We are willing to pay for the radio we want because the local stations are indistinguishable and corporately-run, showing little empathy with the areas they serve. The NAB's petition is just a self-serving ploy to avoid competing, which I thought was supposed to be the American way.
